

# Covid 19 Deaths and Vaccinations Dashboard

**Description:** The state of the relationship and evaluation of the effect of vaccines on monthly deaths. The data is derived from linking the daily vaccination dataset with the daily deaths dataset.

**Key insights:** As the number of vaccinated people increased, it was concluded that the number of monthly deaths decreased. This suggests that achieving high vaccine coverage was crucial in reducing the global mortality burden of COVID-19.

People Vaccinated and New daily Deaths by month and year
